

# Federal Estimated Tax Calculator

for the Tax Year 

2025 ▾

This tool is intended to help you determine how much federal income tax you would owe given the data you provide. Unlike a program for doing your taxes, which performs many more calculations, this tool just computes the amount of the tax given the values you enter. This allows you to experiment with different values to see the effect on your taxes.

The blue fields are computed from the information you provide. The green fields are where you enter information. The first column shows where the information can be found in the tax return. Click [this link](#) for more help with this tool.

### Tax Formula

The tax formula below describes, at a high level, how the tax is calculated. The value of each item in the tax formula is shown in the Estimated Tax Calculation. You can see a brief description of any of the items by moving the mouse over the calculated value in the Estimated Tax Calculation.

|                                  |                                                                |
|----------------------------------|----------------------------------------------------------------|
| Total Income                     | = Income from all sources - Non-taxable Income                 |
| Adjusted Gross Income            | = Total Income - Adjustments                                   |
| Taxable Income                   | = Adjusted Gross Income - Deductions                           |
| Total Tax                        | = Tax on Taxable Income + Other Taxes - Non-refundable Credits |
| Refund / Amount Due              | = Payments + Refundable Credits - Total Tax                    |
| Estimated Quarterly Tax Payments | = (Estimated Payments - Amount Due) / 4                        |
